

The Uber Transition

Q1 2026- Q4 2027

Autonomy for our Stakeholders

Vashishth Doshi

~~Transition Planning~~ Cultural Lift

- The significance
 - One of the biggest automations since cotton factories
 - 8.8 million Uber drivers in the long run are extended stakeholders
 - Uber's biggest expense is driver payments. It will become capital expenses
- Uber needs to take all stakeholders along
 - Changed worlds need changed companies
 - Transition lifts human economic capabilities and expands possibilities
 - We are founding the future autonomy of our stakeholders

Stakeholder 1

Current Uber Drivers

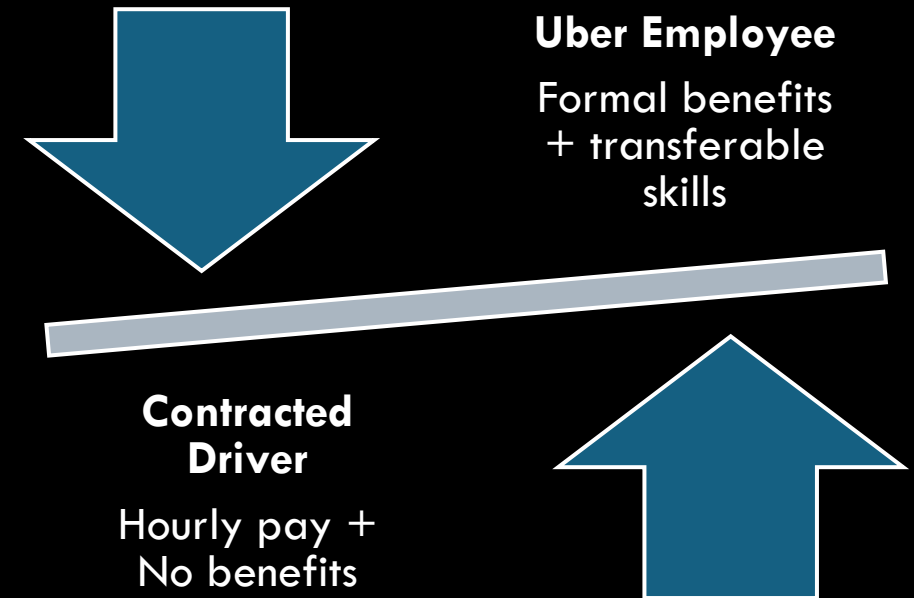

- Core issue:
 - Reduced job opportunities + Reduced economic participation
 - Vulnerable populations at risk
- Incentives:
 - Sustained Livelihood + Economic Stability
 - 0 vs. Tech forward employability

Uber

- Core interest:
 - New functions: Maintenance + Vehicle Retrieval + Remote Ops
 - Driver retention is 4-25%
- Incentives:
 - Low talent training costs for L4 fleet maintenance + pre-vetted employees

~~Talent Acquisition~~ Career Transition

- New Uber functions (often local):
 - Maintenance | Operations | Sensor-cleaning | Vehicle retrieval | Remote tele-operations
- Uber has 8.8 million hands ready to help them
 - Direct outreach | Vetted workforce
 - Analogy: Amazon's Career Choice Program ¹
- Financially Viable
 - Uber's driver acquisition cost ~ \$ 3,250 ²
 - Per driver upskilling ~\$ 2,625 ³

Stakeholder 2

Local Government

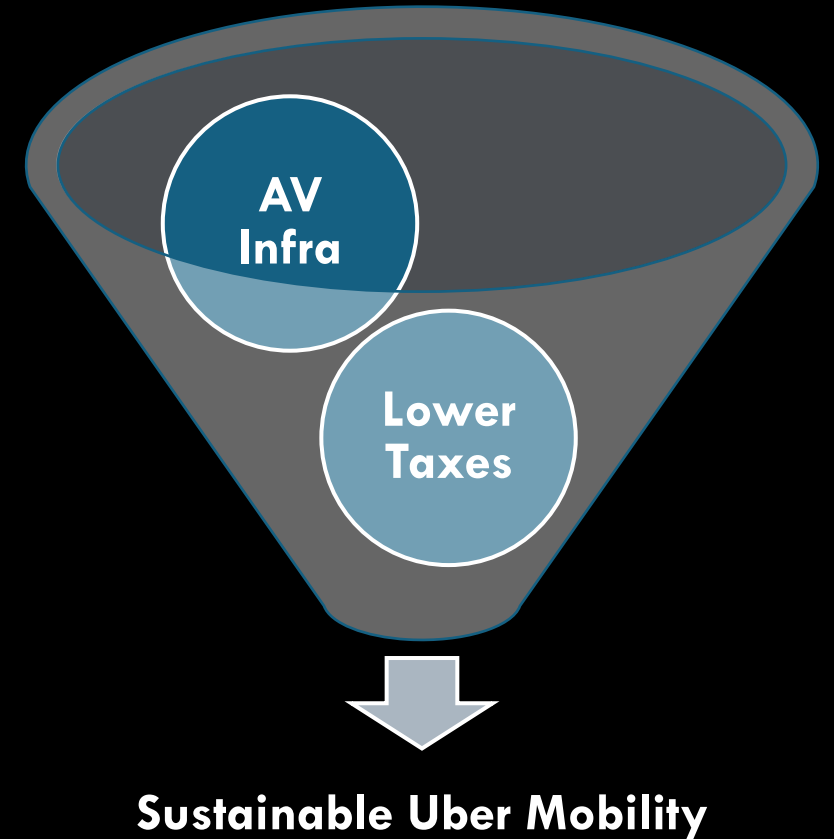

- Core issue:
 - No jurisdiction + Full accountability
 - Infrastructure Cost ⁴
- Incentives:
 - Financial Stakes
 - Urban Planning

Uber

- Core interest:
 - Per-mile taxation is unsustainable
 - AV first infrastructure
- Incentives:
 - Sustainable taxes
 - High synergy with local governments

Championing Taxes

- Local Infrastructure:
 - Taxes: Pro-EV special taxes⁵ like airline industry⁶
 - AV Telemetry data for local governments
 - Pothole mapping⁷
 - Urban planning + road engineering insight
- Financially Viable
 - AV Telemetry Data ~ \$ 0 vs. long time benefits
 - Per-mile taxes unsustainable for AVs
 - Lower maintenance costs

Stakeholder 3

Local Communities

- Core issue:
 - Employees are far from employers
 - Unsafe, far-off public transport
- Incentives:
 - Reliable mobility
 - One-window solutions

Uber

- Core interest:
 - Local Economies are Origin/ Desti.
 - Fleet utilization
- Incentives:
 - Uber-integrated local mobility
 - 0 onboarding/ marketing costs

Urban Uber Mobility

- Community Onboarding
 - Augment Bus Systems in school districts
 - Last Mile to Public Transit vouchers⁸ + Airport shuttles
 - Vulnerable Population vouchers
 - Employee transportation vouchers
- Financially Viable
 - 0 investment customer onboarding
 - Longer rides + More rides = fleet utilization⁹
 - Uber lifestyles = long term customers

Stakeholder 4

Regulators

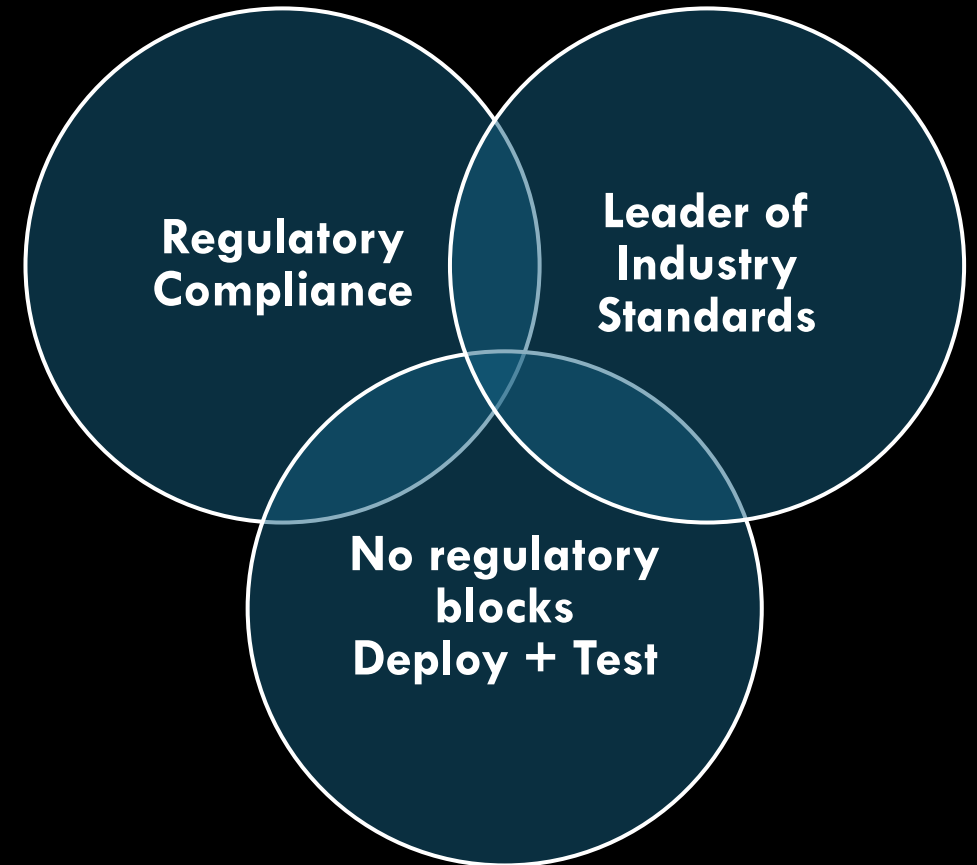

- Core issue:
 - Private incentives misaligned
 - Government rules inefficient
- Incentives:
 - Market – Government common ground
 - Industry trust

Uber

- Core interest:
 - Liability regulation
 - Compliance should be competitive
- Incentives:
 - Regulation consistency
 - Industry standardisation

Regulatory Oversight Foresight

- Proactive Participation
 - Independent Consortium
 - Safety | Labour | Liability
 - Metric data dashboards
 - Analogy: FAA's Integration Pilot Program for commercial drones ()
 - Deployment + Testing
- Financially Viable
 - Marketing + Logistics Expenses
 - Prevented Lawsuits
 - Collaborative competition

Stakeholder 5

Other Road Users & Uber

- Core interest:
 - Fault Logging
 - Insurance Claims
- Incentives:
 - Liquidity > Litigation
 - Increased system trust

Insurance Assurance

- Proactive Insurance Pipelines
 - Fault-logging via dashcams
 - Specialized cells for claim handling via Uber – shows responsibility
 - Analogy: Truck Claim Processing ()
- Financially Viable
 - Limited litigation
 - Lower insurance rates
 - Perception of responsibility

Systemic Lifts and Societal Gains

Uber Autonomy

City Town Halls | Trust

Regulatory Proactivity | Trust

School District Partnerships | Trust

Insurance Claim Processing | Trust

Participatory Urban Planning | Trust

Community Event Partnerships | Trust

Transparency of Safety Metrics | Trust
